Skills

Ruby on Rails ★★★★⯪

iOS Development ★★★★⯪

Node.js ★★★☆☆

Wordpress ★★★★☆

Web Design ★★★⯪☆

Android Development ★★★★☆

Photoshop & Graphics ★★★⯪☆

I'm highly skilled in Web and Mobile app development and have experience with different Web Frameworks, NoSQL Databases, Deployment and Testing Services, Web APIs, Data Statistics & Analytics. I've managed and deployed over Twenty different apps to Heroku, Openshift and Private Servers.

Previous Clients & Projects

Bluewave

A German startup. My work included design & development of their iOS app from scratch. Other than Location services and Push Notifications, It involved advanced development techniques such as Custom Animations and UIs.

Crewcade

A free web platform that allows teams to get sponsorships. My work included Backend Development, Recurring Online Payments, Microsponsor Credit Management System and Implementation of Bracket Generation Algorithm.

Smallnest

Smallnest is a silicon valley startup. I provided Backend Optimization, Data Statistics and also added a couple of new features to their app.

DevFiles.co

A File-Hosting service built on Rails from scratch and hosted on Heroku. It uses Amazon S3 for Storage and MongoDB as the Database.

I've done different jobs for different clients over the years, but my best work has involved Ruby on Rails, Web APIs and Mobile App Development. I highly recommend that you see my LinkedIn Profile for a list of all my previous projects, since it's not possible to list all of them here.

Work Experience

Freelance Developer
(2010-Present) - Over 7 International Projects
